

COMTRAXX® CP9...-I series

Condition monitor with display and an integrated gateway

COMTRAXX® CP9...-I series

Device features

- Display size 7" and 15.6" with tempered and anti-reflective glass
- Easy to clean and disinfect, degree of protection IP54
- · Screwless mounted front plate
- · Condition monitor for Bender systems
- Integrated modular gateway between Bender systems and TCP/IP
- Remote access via LAN, WAN or Internet
- Support of devices that are connected to the internal BMS bus, via BCOM, Modbus RTU or Modbus TCP
- Individual visualisation can be generated, which can be viewed via the web browser or on the display
- Silent due to operation without fan
- High-quality representation with excellent contrast, high resolution and a wide viewing angle
- · Possibility of graphical integration of building plans or status display in photo quality
- · Visual and acoustic notification in the event of an alarm

Data transfer interfaces

Certifications

Product description

The COMTRAXX® CP9...-I series features a condition monitor with web interface and a display, which is available in different sizes. All Bender devices can be connected via the integrated interfaces. In addition, third-party devices can also be integrated into the system. The measured values, parameters and all other data can be checked and parameterised via the web interface or the display. There is a wide range of options for indicating and visualising alarms. Due to the robust surface and design, there are no limits to the application scenarios.

Application

- Monitoring and parameter setting of all Bender products that support communication
- Mounting in the control cabinet door so that all information is immediately visible
- Commissioning and diagnosis of Bender systems
- Remote diagnosis and remote maintenance
- · Control stations in all areas
- · Monitoring and analysis of data centres

Scope of functions (V4.5.0 and higher)

- · Condition monitor with web interface and display
- · Interfaces for the integration of devices
- Internal BMS bus (max. 150 devices)
- BCOM (max. 255 devices)
- Modbus RTU and Modbus TCP (max. 247 devices each)
- Selectable display content
 - System overview with all devices, measured values, parameters and alarms
 - Individually configurable visualisation
- Ethernet interface with 10/100 Mbit/s for remote access via LAN, WAN or Internet
- · Time synchronisation for all assigned devices
- History memory (20,000 entries)
- Data loggers, freely configurable (30 x 10,000 entries)
- Assignment of individual texts for devices, channels (measuring points) and alarms
- · Device failure monitoring
- E-mail notification to different users in case of alarms and system errors
- Device documentation* can be created for any device in the system
- System documentation can be created. It documents all devices in the system at once
- Reading the latest measured values, status and alarms messages from all assigned devices. Uniform access to all assigned devices via Modbus TCP over integrated server.
- Reading the latest measured values, status and alarm messages from all assigned devices via internal BMS. Uniform access to all assigned devices via Modbus RTU.
- Control commands: From an external application (e.g. visualisation software or PLC), commands can be sent to BMS devices via Modbus TCP or Modbus RTU
- Access to alarms and measured values via SNMP (V1, V2c or V3). SNMP traps are supported.
- Access via PROFINET to alarms and measured values
- Fast and easy parameter setting of all devices assigned to the gateway via web browser or display
- Device backups can be created and restored for all devices in the system

- Quick and easy-to-create visualisation of the system. Integrated editor provides access to a variety of widgets and functions.
 - Display on up to 50 overview pages, where e.g. room plans can be stored. It is possible to navigate within these pages
- Access to all measured values that are available in the system
- Buttons and sliders can be used to send BMS test and reset commands, as well as to control external devices via Modbus TCP
- 100 virtual devices with 16 channels each can be created.
 There, for example, calculations of several measured values can be carried out and the result can be used in the system as a new measured value
- 1,600 data points from third-party devices (via Modbus RTU or Modbus TCP) can be integrated into the system
- * Contains all parameters and measured values belonging to the device, as well as device information such as serial number and software version.

Technical data

Insulation coordination acc. to IEC 60664-1	Interfaces
CP907-I	Ethernet
Rated voltage 50 V	Connection RJ45
Overvoltage category III	Cable shielded, both ends of shield connected to PE
Pollution degree 2	Cable length < 100 m
Rated impulse voltage 800 V	Data rate 10/100 Mbit/s, autodetect
CP915-I	HTTP mode HTTP/HTTPS (HTTP)*
Rated voltage AC 250 V	DHCP on/off (off)*
Overvoltage category III	$T_{\rm off}$ (DHCP) 560 s (30 s)*
Pollution degree 2	IP address nnn.nnn.nnn (192.168.0.254)*, can always be reached via: 169.254.0.1
Rated impulse voltage 4 kV	Net mask nnn.nnn.nnn (255.255.0.0)*
Supply	Protocols TCP/IP, Modbus TCP, Modbus RTU, DHCP, SNMP, SMTP, NTP
	BMS bus
CP907-I via plug-in terminal (A1/+;A2/-) Nominal voltage DC 24 V SELV/PELV	Interface/protocol RS-485/BMS internal
Nominal voltage tolerance ±20 %	Operating mode master/slave (master)* Baud rate 9.6 kBit/s
Typical power consumption at DC 24 V < 15 W	
Connection pluq-in terminal (A1/+;A2/-)	Cable length < 1200 m Cable shielded, one end of shield connected to PE
Maximum cable length when supplied via B95061210 (24-V DC power supply unit 1.75 A):	recommended: CAT6/CAT7 min. AWG23
0.28 mm ² 75 m	
0.5 mm ² 130 m	alternative: twisted pair, J-Y(St)Y min. 2x0,8
0.5 mm ² 200 m	Connection "ABMS" (see plug-in terminal)
1.5 mm ² 400 m	Terminating resistor 120 Ω (0.25 W), can be connected internally (see plug-in terminal)
2.5 mm ² 650 m	<u>Device address</u> 1150 (1)*
	BCOM
CP907-I via Power-over-Ethernet (PoE)	Interface/protocol Ethernet/BCOM
Nominal voltage DC 48 V SELV/PELV	BCOM system name (SYSTEM)*
Nominal voltage tolerance -25+15 %	BCOM subsystem address 1255 (1)*
Typical power consumption for PoE < 15 W	BCOM device address 0255 (0)*
Maximum cable length when supplied via AWG 26/7; 0.14 mm ² 100 m	Modbus
CP915-I via terminal block (L1; N)	Bender Modbus image V1, V2 (V2)*
Nominal voltage CP915-I via external power supply unit AC 100 240 V	Modbus TCP
Nominal voltage tolerance -15+10 %	Interface/protocol Ethernet/Modbus TCP
Frequency range U_s 5060 Hz	Operating mode client for Bender Modbus TCP devices and "third-party devices"
Typical power consumption at AC 230 V < 30 W	Operating mode server for access to process image and for Modbus control commands
Connection terminal block (L1; N)	Parallel data access for different clients max. 25
Stored energy time in the event of voltage failure	Modbus RTU
Time, date min. 3 days	Interface/protocol RS-485/Modbus RTU
	Operating mode master/slave (master)*
Displays, memory	Baud rate 9.657.6 kBit/s
Display	Cable length < 1200 m
CP907-I 7" TFT touch display	Cable shielded, one end of shield connected to PE
CP915-I 15.6" TFT touch display	recommended: CAT6/CAT7 min. AWG23
E-mail configuration and device failure monitoring max. 250 entries	alternative: twisted pair, J-Y(St)Y min. 2x0,8
Individual texts unlimited number of texts with 100 characters each	Connection "AMB", "BMB" (see plug-in terminal)
Number of data points for "third-party devices" to Modbus TCP and Modbus RTU 1 600	Terminating resistor 120 Ω (0.25 W), can be connected internally (see plug-in terminal)
Number of data loggers 30	Supported Modbus RTU slaves addresses 2247
Number of data points per data logger 10 000	PROFINET
Number of history memory entries 20 000	Interface/protocol Ethernet/PROFINET
Visualisation	Operating mode slave (IO device)
Number of pages 50	SNMP
Background image size max. 3 MB	Interface/protocol Ethernet/SNMP
	Versions 1, 2c, 3
	Supported devices query of all devices (channels) possible
	Trap support yes
	USB
	Number 2
	Operating mode USB 2.0 host (5 V, 500 mA)
	Data rate 480 Mbit/s
	Cable length 2 m
